SKILLS

- **Languages:** C++, C, Python
- **Frameworks:** React, Tailwind CSS, Express JS, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Tools/Platforms:** Excel, Power BI, VS Code, Git, GitHub
- **Soft Skills:** Time management, Adaptability, Resilience

PROJECTS

Netflix Data Analysis | [GitHub](#)

Sep 2025 - Nov 2025

- Executed an end-to-end exploratory data analysis on the Netflix Movies & TV Shows dataset to identify trends in genre popularity, country-wise production, and yearly content growth.
- Leveraged Python, Pandas, NumPy, Matplotlib, and Seaborn for data cleaning, feature engineering, and large-scale data visualization entertainment data.
- Analysed 8,000+ Netflix titles using advanced visual analytics and built a TF-IDF-based recommendation system achieving ~85% content similarity accuracy
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn

ChatX | [GitHub](#)

May 2025 - Jul 2025

- Architected a full-featured ChatGPT-style AI web application enabling real-time conversations, adaptive chat history management, and context-aware responses.
- Established a React.js and Node.js-based architecture integrating secure authentication, RAG pipelines, and vector database memory storage.
- Achieved low-latency, context-aware AI responses with sub-600ms vector retrieval, improving response relevance by ~40% using RAG and supporting 100+ concurrent chats.
- **Tech Stack:** HTML, CSS, JS, React, Node JS, REST APIs

Flight Delay Prediction | [GitHub](#)

Feb 2025 – Mar 2025

- Implemented an end-to-end flight delay prediction system using machine learning on 113K+ records, enabling real-time forecasting and operational optimization.
- Developed machine learning models using Python and scikit-learn, applied SMOTE for class imbalance, and deployed real-time visual dashboards using Streamlit and Plotly.
- Applied feature engineering and cross-validation to achieve 96.7% accuracy, 0.892 ROC-AUC, and 99% recall on 113K+ records, integrated into a 4-module analytics dashboard.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn

TRAINING

Data Structure and Algorithm using C++ | [PW Skills](#)

Jun 2025- Sep 2025

- Completed a 3-month summer training in Data Structure and Algorithm using C++ at Pw Skills.
- Gained hands-on experience in Data Structure and Algorithm concepts including Trees, Graphs, Linked Lists.
- Developed a Hospital Management System in C++ with features like Patients and Doctor scheduling appointments, Doctor inquiry, Details of appointments, Digital Prescriptions, and transaction history.

CERTIFICATES

- Mern Stack with Generative AI | [Shevians Coding School](#) Sep 2025
- Build Generative AI Apps and Solutions with No-Code Tools | [Infosys](#) Jun 2025
- Social Networks | [NPTEL](#) Apr 2025

ACHIEVEMENTS

- **4-star C++ badge achievement** Nov 2024
Earned a 4-Star out of 5-Star C++ Skill Badge on Hacker Rank

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.21** Aug 2023-Present
- **Maharaja Agrasen Public School, Khurja** Khurja, Uttar Pradesh
Intermediate; **Percentage: 84** Apr 2022 - Mar 2023
- **Maharaja Agrasen Public School, Khurja** Khurja, Uttar Pradesh
Matriculation; **Percentage: 92** Apr 2020- Mar 2021
